EDUCATION

University of Southern California

Los Angeles, California

Bachelor of Science Economics and Data Science

August 2023-May 2027

Relevant Coursework: Linear Algebra and Linear Differential Equations, Calculus I-III, Foundations of Data Management, Discrete Methods in Computer Science, Intermediate Macroeconomic and Microeconomic Theory, Introduction to Econometrics

PROJECTS

AI-Labor Effect Research Paper [Link](#)

January-May 2026

- Built regression models on 650+ occupations to analyze AI’s impact; improved model fit (R^2 0.08 $\rightarrow$ 0.23)
- Cleaned and merged multi-source datasets (BLS, O*NET); addressed multicollinearity and heteroskedasticity
- Derived business insights on AI’s labor impact to support data-driven decisions

USC Baseball xBA [Link](#)

August 2025

- Developed a data-driven decision support tool to evaluate player performance using expected batting average (xBA) model
- Partnered with stakeholders (coaches) to define key performance metrics and align outputs with decision-making needs
- Delivered insights through visualizations that improved evaluation of player performance and informed lineup strategy

2024 Transfer Portal [Link](#)

May-July 2024

- Defined user requirements with coaching staff to streamline recruiting evaluation workflows
- Designed and launched a data-driven recruiting platform (Sheets + Python scraping) to centralize player insights
- Iterated on product features and UI based on stakeholder feedback, improving usability and decision speed in recruiting

WORK EXPERIENCE

USC Baseball

Los Angeles, California

Student Manager

August 2023-Present

- Owned performance data collection and analysis tools (Trackman, Synergy), supporting data-driven coaching decisions
- Synthesized insights from 100+ games/practices into actionable reports, improving team preparation and strategy execution
- Collaborated with coaches to translate data and video into usable decision-making outputs

Bay Area Rapid Transit (BART)

Oakland, California

Systems Engineering Intern

June 2022-August 2024

- Conducted user research and performance testing on fare gate prototypes, identifying key usability issues
- Translated user insights into product recommendations that informed design and rollout decisions
- Produced structured reports converting stakeholder discussions into actionable product and engineering priorities

Youth Giving Project

San Ramon, California

Club President

August 2019-June 2023

- Created educational STEM kits for underserved youth across the Greater Bay Area, providing hands-on learning opportunities in science, technology, engineering, and mathematics
- Spearheaded philanthropic programs for children's hospitals and foundations, managing fundraising events, donor relations, and distribution of essential care packages to pediatric patients

Advancement Via Individual Determination (AVID)

Danville, California

High School Tutor

August 2022-June 2023

- Selected to tutor a cohort of about 20 students in a variety of subjects including math, history, and English

LEADERSHIP & INVOLVEMENT

USC Sports Business Association

Los Angeles, California

General Member

August 2023-Present

- Participated in speaker events and workshops focused on sports analytics, management, and industry career paths

SKILLS & INTERESTS

Languages: Mandarin, English

Product: User research, data analysis, A/B thinking, stakeholder collaboration, iteration

Technical Skills: Google/Microsoft Office Suite, Microsoft Excel, C++, SQL, Java, Python, Synergy, Trackman, BATS
